DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on September 15, 2008 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner. Please be advised that all references were reviewed and considered, however there is at least one reference (Australian Patent Application 2002353174, Office action dated 9/5/2007, 2 pages) that have been lined through because this document is not a published document open to the public. The crossed out reference has been considered and made part of the recorded and will be available for review in the application file.

Response to Amendment

2. In response to the Remarks received on 9/15/2008, the examiner has carefully considered all arguments.

Response to Arguments

3. Applicant's arguments, see Amendment/Remarks, filed 9/15/2008, with respect to claims 1-25 have been fully considered and are persuasive. Applicant's arguments regarding the premature obviousness-type double patent provisional rejections are persuasive. The instant application is the earlier filed application and per instructions in MPEP section 804 because the others two co-pending application have not issued, the provisional double patenting rejections in the instant case are withdrawn.

Allowable Subject Matter

4. Claims 1-25 are allowed.

5. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the claims is the laser enhancing additive comprising a first quantity of at least one CuKI_3 , CuI , KI , NaI and AlI ; and a second quantity of at least one ZnS , BaS , alkyl sulfonate

and thioester in combination with a modified, for increased thermal conductivity, host material. The prior art (see attached PTO 892) teaches compositions having laser engraving properties; however these compositions and method teach adding laser absorbing compounds, such as sensitizing dyes or fillers, such as carbon black. The prior art fails to teach articles of manufacture having the claimed laser additive in the preparation of said articles or in different layers of laminates used in preparing said articles of manufacture. The instant invention is distinguished over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the preliminary amendment to the specification, filed 07/14/2004, on page 2, line 4 of the amendment, after the words "*Robert Jones*" please *insert*, the words ", now abandoned"

*please note this amendment to the specification was made to update the continuing data, no other changes have been made.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sanza L. McClendon whose telephone number is (571) 272-1074. The examiner can normally be reached on Monday through Friday 7:30-4:00.
